Quality Production Assurance Group

# Your partner for professional and custom quality solutions.

When we say "custom" we mean it literally. Every company has its own specific needs and requirements, and we respect that. Our team of specialists carefully analyses your production processes and proposes solutions that will perfectly match your individual needs. Address quality exactly as you need it.

**We are Quality Production Assurance Group.**

## **TM TECHNIK**

Calibrations, sales and service of hand gauges and 3D measuring systems, custom measurement services

## **100% REWORK**

Measurement services, training and audits, quality control, technical cleanliness services

## **100% REWORK Plus**

Sheltered workshops, services in facultative compensation

## **100% REWORK Digital**

Automation and digitalization of quality control and production

## **WORK Spot**

Recruitment Centre and Personnel Services

## **MEGA SYSTEMS**

Services in the design of measuring instruments, multi-purpose measuring machines, production of other technological equipment and structures

**Skupina QPAG**

# When it comes to quality, we know how to help.

All the companies in the group specialise in a certain area of quality. We bring valuable experience, knowledge, insight into market developments and new technologies to managers in manufacturing companies. Together we find the right solutions for customized quality control processes.

# Quality is our priority

---

“We want to be the key to our customers’ satisfaction. Everything we do is based on our deep trust in the people we work with. We realise that trust is the pillar of a successful partnership.”

**Tomáš Pavlík**

owner of QPAG

# TM TECHNIK

**We measure, calibrate, provide services.  
All in one place, always accurate.**

- accredited calibration laboratory
- sale of hand gauges
- sale of measuring machines
- installation and service of measuring equipment
- measuring services

**Friendly and  
professional  
service**

**Measuring services  
around Czechia  
and Slovakia**

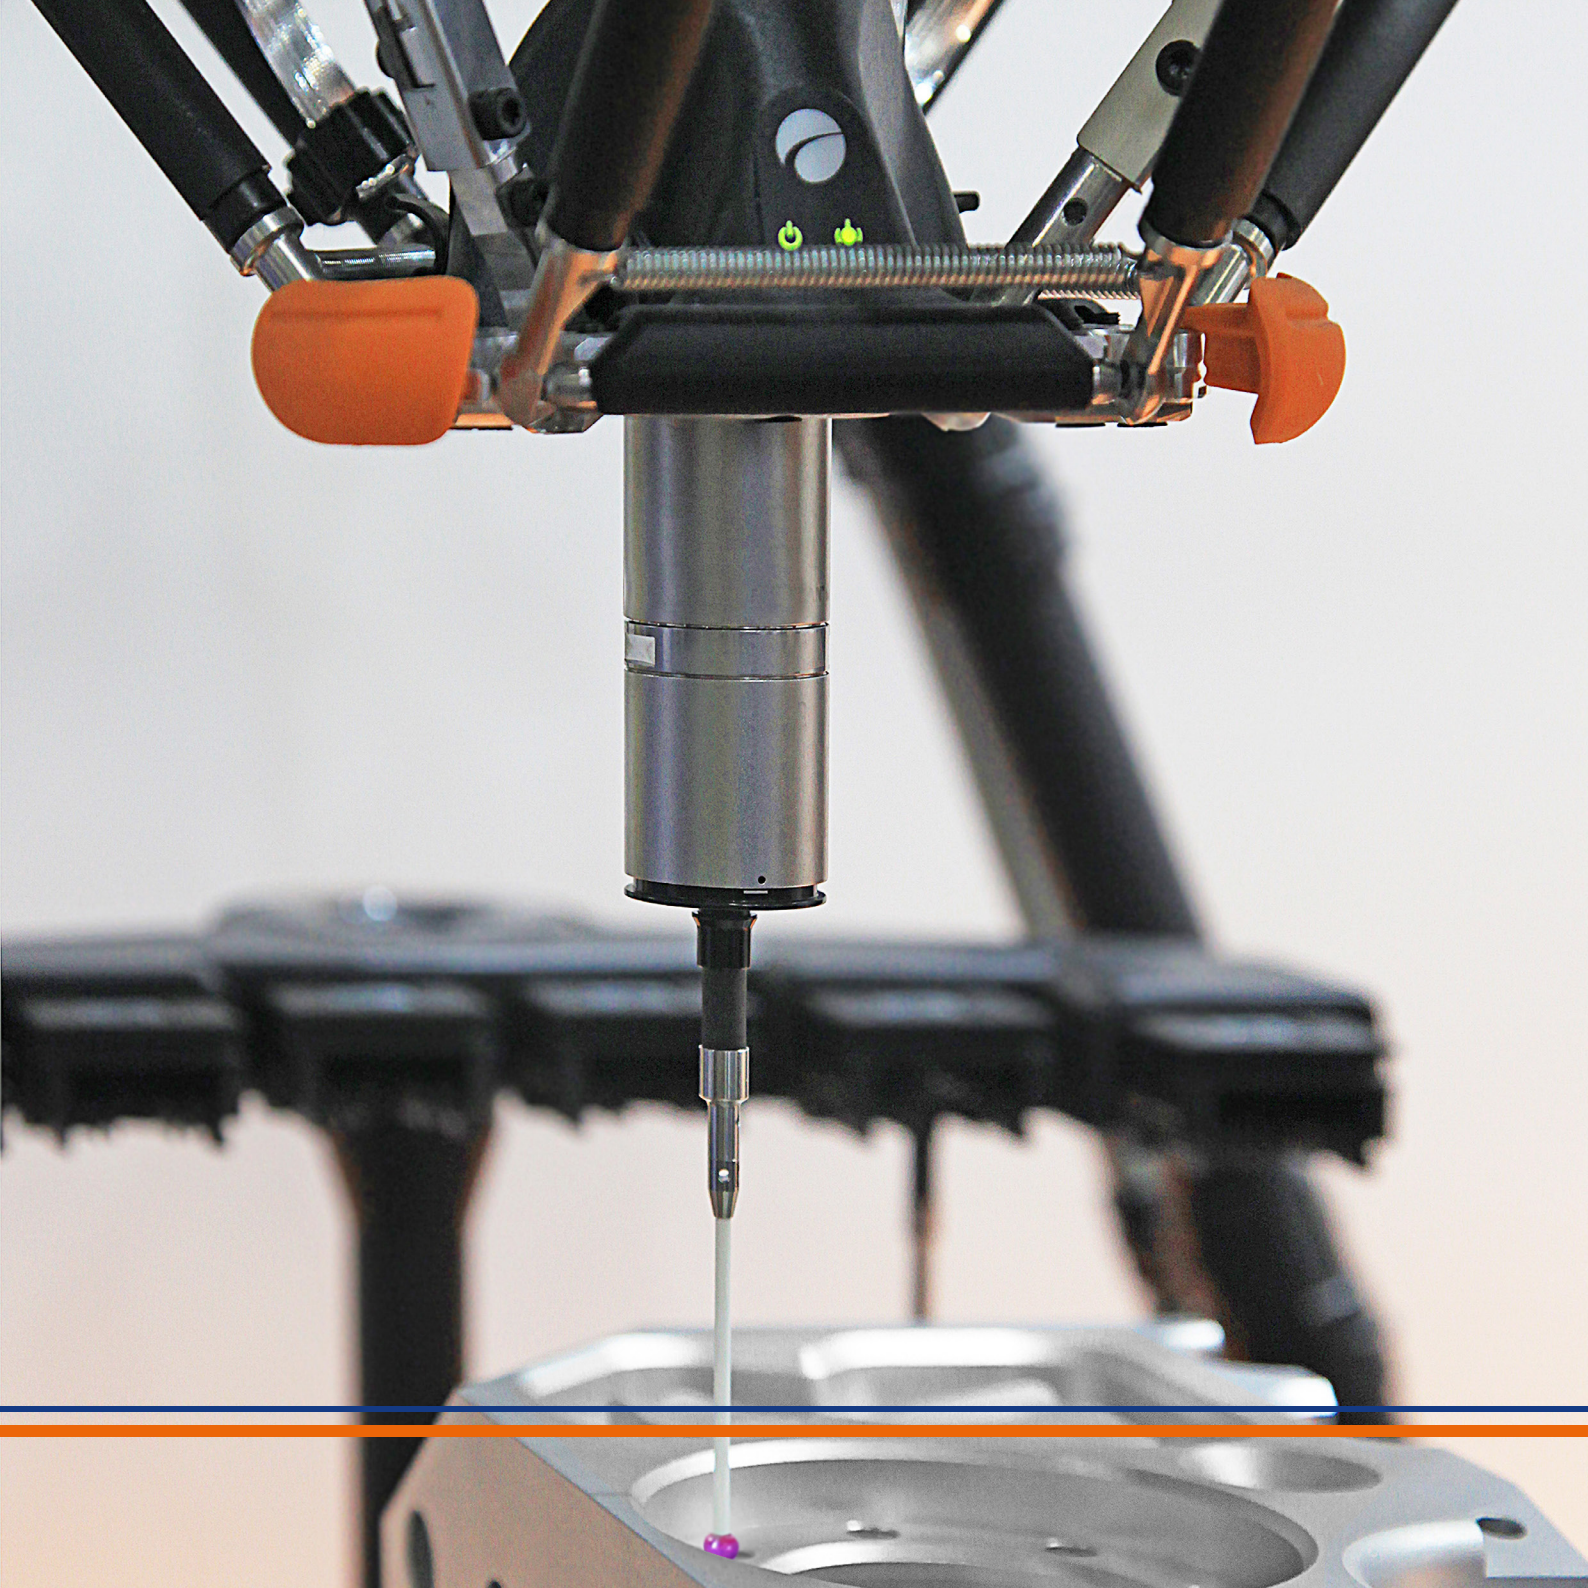

## **Accreditation EN ISO/IEC 17025:2018**

Accredited calibration in the quantities of:  
length, plane angle, force, digital pressure, flow

# 100% REWORK

We have been providing quality services in manufacturing companies for more than 20 years

- assembly and minor rework of parts
- measurement and testing of products
- technical cleanliness
- consultation, training, audits, resident activities
- sorting and quality control

**TISAX**<sup>®</sup>

**Friendly approach**

**Reliability  
and fairness**

**Responsibility  
and stability**

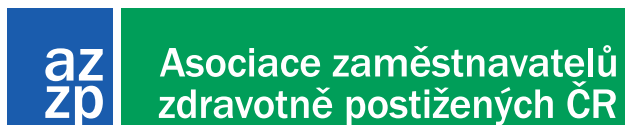

**Innovation  
and trends**

# 100% REWORK Plus

## We support people with disabilities and follow quality standards

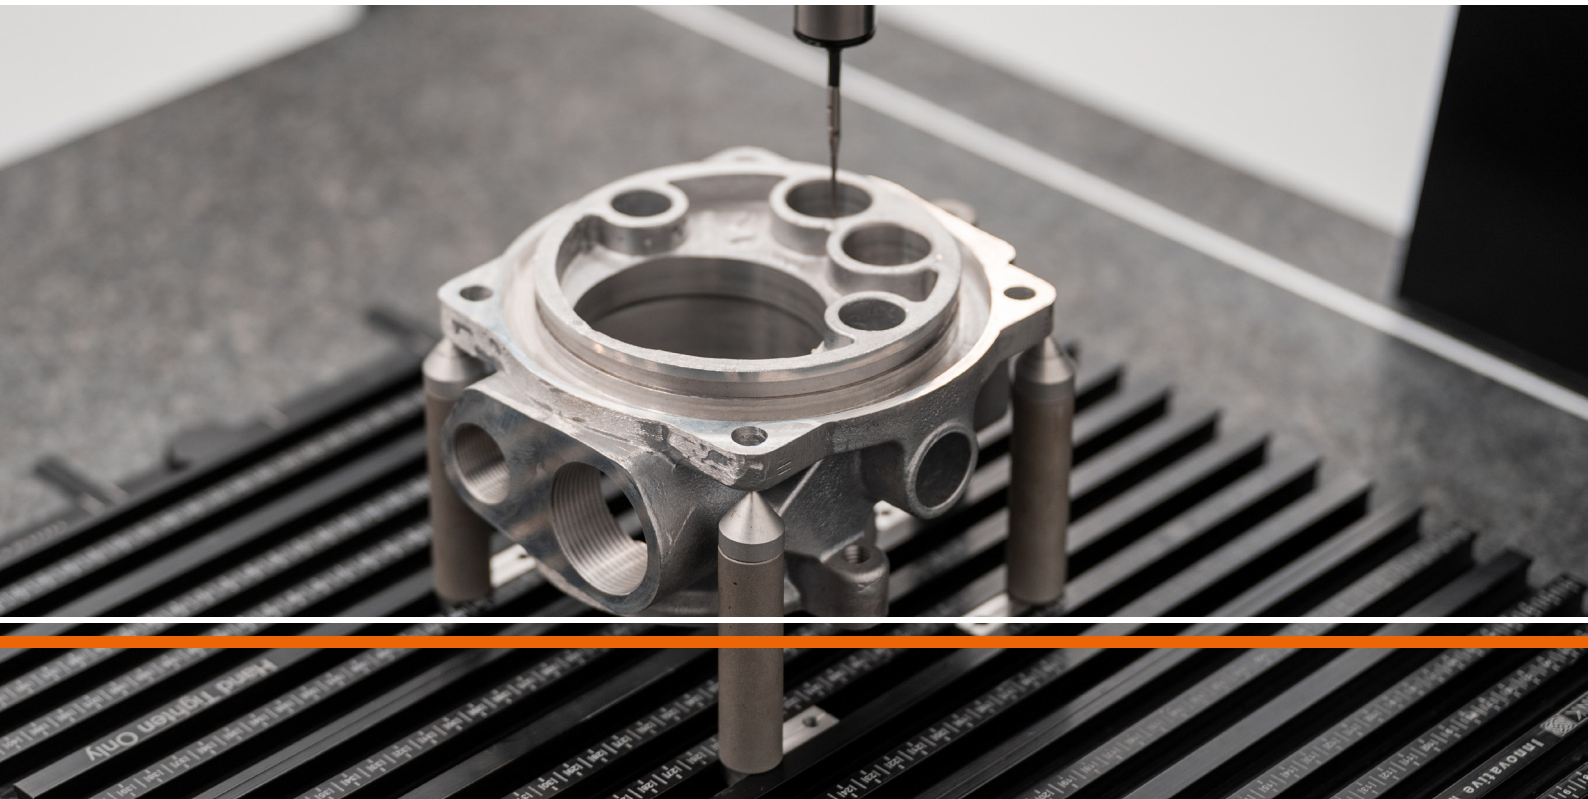

- In accordance with ČSN EN ISO 9001:2016
- We bring mutual benefit
- We minimize barriers between healthy and disabled people

# 100% REWORK Digital

**Our customers' needs drive us further. We are teaming up with the companies that are shaping the future of quality.**

Together with you, we will review your production and inspection process and propose the necessary changes in automation deployment, digitalization, and improvement of function and final controls. Experienced AI solutions and automation providers have joined together under our leadership.

# WORK Spot

Thanks to our networking in the QPAG group, we help the biggest companies to get them out of a tight spot in the field of HR.

→ **Permanent Placement**

Filling positions in the client's team, from entry-level positions to mid-level management

→ **Staffing – Agency Employment**

Temporary placement of an employee of an employment agency to work for an employer (client) on the basis of an employment contract or also in the form of an agreement on working activity.

→ **Recruitment of foreign workers**

Targeted recruitment from a predefined country, providing all necessary documents and coordinating the recruitment process directly abroad.

## Complete AI-driven quality control

Automation and digitalisation of quality control thanks to ANNIE by 24 VISION.

- detection of visual defects
- configuration control
- real-time analysis

## Customized measuring tools.

We are a supplier of multi-purpose measuring machines, single purpose machines, assembly lines, custom workshop gauges and fixtures.

We also design and manufacture other industrial equipment and structures according to the customer's specifications.

# Where we operate

# QPAG

## Our main locations:

Brno | Jihlava | Mladá Boleslav |

Kláštorec nad Ohří | Nový Jičín | Vsetín

# Our values

## People

We encourage a friendly attitude and an open environment. We work as a team. We want to improve and grow.

## Reliability and fairness

We treat our employees, customers and suppliers fairly and with respect. We keep our word.

## Responsibility and stability

We are committed to worker safety and personal accountability for the quality of services we provide.

## Sustained development

We follow trends, innovate and constantly improve our services.

**Our services**

# Quality management training

We create customized quality training courses that combine our extensive practical experience with theoretical knowledge. We specialize in the field of consulting and auditing according to IATF 16949, VDA 6.3, ISO 9001 and ISO 14001.

Our aim is to provide your employees with new skills and also to ensure that they can apply this knowledge seamlessly in practice. Training sessions are designed to meet the specific needs of your company and to ensure that participants can immediately apply their newly acquired knowledge in their work environment.

With our closed courses conducted on-site at your company, you can immediately apply the material discussed in a real-world environment. In addition, we offer consulting and auditing to the latest standards such as IATF 16949, VDA 6.3, ISO 9001 and ISO 14001 to ensure your company is achieving the highest quality standards.

# Resident services

Our resident service is a professional team that represents your company directly at the customer's site. Our residents are top professionals with deep knowledge of your products and processes. Their role is to actively monitor and address any quality issues and needs that may arise during business cooperation.

## Our residents' key attributes include:

1. Representing the supplier to the customer: residents represent your team directly in the customer's environment, ensure communication and actively work to strengthen business relationships.
2. Responding quickly to quality issues: residents are trained to identify and resolve issues quickly, ensuring smooth delivery and customer satisfaction.
3. Identifying bottlenecks in the process: residents' specialised insight allows them to identify potential improvements and optimisation throughout the production and supply chain.
4. Monitoring the quality of delivered parts. Our service technicians will be happy to train you according to your specific requirements.

With our resident service, you can be sure that your interests are always represented at the highest level, helping to strengthen your market position and build long-term business relationships.

---

# You specify, we measure

- 1 Dimensional measurement according to drawing documentation
- 2 Comparison of parts with 3D model for sampling purposes
- 3 FMEA data processing for SPC etc.
- 4 Measurement of inspection fixtures including their subsequent adjustment and repair
- 5 Reverse engineering for the purpose of repairing shaped parts and moulds from which CAD data is missing

## **AUKOM certificate**

All our staff are certified and trustworthy experts in their field

# Calibration laboratory

The calibration laboratory is accredited by the Czech Institute for Accreditation according to ČSN EN ISO/IEC 17025:2018 and is authorized to use the designation "Accredited Calibration Laboratory No. 2322" in its activities within the given range.

## Complete care for your measuring instruments

**Collection of measuring instruments**

**Servicing of measuring instruments**

**Maintenance of measuring instruments**

**Calibration of measuring instruments for construction**

**Consulting in metrology**

**Providing calibration sheets in electronic form in CZ/EN**

# Machine installation and service

Our service department provides all warranty and post-warranty service for the supplied products.

## We install, calibrate and provide training for:

- ✓ 3D CMMs
- ✓ Measuring arms
- ✓ Height gauges
- ✓ Digital measuring microscopes
- ✓ Leak testers
- ✓ and more...

1

**We will deliver and install the machine**

2

**We will provide calibration**

3

**We will train the operator of the machine**

Our service team is ready to respond quickly to address customer requirements.

# Technical cleanliness

*We have a validated Technical Cleanroom to ISO 8 ("D") standard.*

## Visual inspection in a technically clean environment:

**Minimise contamination of your parts**

**Increase the quality of your products**

**Reduce your costs**

## We assess the risks for you

### **We meet the standards**

We have evaluated all risks in accordance with ČSN EN ISO 9001:2016. We meet the requirements of customers in the automotive sector, especially IATF 16949 and VDA series standards.

### **Periodic audits**

We have trained VDA 6.3 first- and second-party process auditors who regularly perform internal audits of all our sites, among other things.

### **Corrective actions**

In case of non-conformities, we set corrective measures for which we use PDCA methodology, 8D report, Ishikawa diagram and others.
